## An Introductory Laboratory Course

# Synthetic Biology

## An Introductory Laboratory Course

Shamlan M. S. Reshamwala, Ph.D.

Assistant Professor

Shalini Deb, Ph.D.

Research Scientist

DBT-ICT Centre for Energy Biosciences  
Institute of Chemical Technology  
Matunga (East), Mumbai 400019  
India

December 2018

Version 1.0

# Contents

<b>Preface</b>	<b>i</b>
<b>Safety in the laboratory</b>	<b>ii</b>
<b>1 Understanding regulation of the <i>lac</i> operon</b>	<b>1</b>
Assess your knowledge . . . . .	2
Requirements . . . . .	4
Day 1 . . . . .	6
Day 2 . . . . .	9
Reviewing your results . . . . .	11
<b>2 The role of promoter sequences in controlling gene expression</b>	<b>12</b>
Assess your knowledge . . . . .	13
Requirements . . . . .	14
Day 1 . . . . .	15
Day 2 . . . . .	17
Reviewing your results . . . . .	18
<b>3 Origins of replication: determining plasmid copy number and incompatibility groups</b>	<b>19</b>
Assess your knowledge . . . . .	20
Requirements . . . . .	21
Day 1 . . . . .	23
Day 2 . . . . .	26

Reviewing your results . . . . .	27
<b>4 Examining the role of RBS sequences in gene expression</b>	<b>28</b>
Assess your knowledge . . . . .	29
Requirements . . . . .	30
Day 1 . . . . .	32
Day 2 . . . . .	36
Reviewing your results . . . . .	37
<b>5 Joining multiple DNA fragments in one step – generating clones quickly</b>	<b>38</b>
Assess your knowledge . . . . .	39
Requirements . . . . .	40
Day 1 . . . . .	42
Day 2 . . . . .	45
Reviewing your results . . . . .	46
<b>Appendix</b>	<b>47</b>
